

# Product Profile

## Product

**TECH 700**

## Overview

The FIRST Specialist advanced **Truck and Bus TPMS Service Tool** from Bartec Auto ID. The tool activates and reads all leading OE TPMS sensors in order to diagnose faults and repair the vehicle. The wide coverage supports major vehicle manufacturers, models and TPMS sensor types. The easy-to-use tool displays prompts to guide the technician and shows data on TPMS sensors, axle configurations and errors. The battery life is displayed to minimise repeat visits for wheel and tyre removal. Displays comprehensive TPMS audit data. Regular software updates. Technical help from our expert multilingual telephone support team.

**Kit contains:** Tool, Quick Start guide, Bluetooth dongle, universal charger, USB mini cable, wireless charger and tool case.

*Wall mounted charging cradle available as an accessory.*

## Technical Specification

- Power Supply: 4000mAh Lithiumpolymer rechargeable battery
- Display: LCD resolution 128 x 64
- Keyboard: 7 keys membrane keypad, dust, water and grease-resistant
- Ports: Mini-B style USB connects to PC for software updates and audit file download
- Working environment: Temp: 0°C to 45°C, humidity: 20-55%
- Storage environment: -10°C to +50°C, humidity: 20-60%
- Low power design for long battery life between charges

Dimensions: 187 x 107 x 47mm

Weight: 410g

## Product Benefits

- Works with all leading Truck and Bus brands
- Supports a wide range of axle configurations and process flow
- Provides detailed sensor battery data
- Provides complete sensor data for wheel audits
- Vehicle test process identifies fully functional sensors, faulty sensors and incorrect used sensors without the need to break down the wheel
- Vehicle sensor relearn
- Supports wheels in a dual configuration
- Single handed operation
- Easy-to-use menu structure
- WiFi software updates allows ease of use
